

## Inspection Report

Jan - Kay Ranch Camp  
436 Private Rd 5001  
Detroit, TX 75436

Customer ID: 8085

Certificate: 74-C-0443

Site: 001

Jan - Kay Ranch Camp

Type: ROUTINE INSPECTION

Date: Jan-09-2014

### 3.75

#### HOUSING FACILITIES, GENERAL.

(c) (3).

\*\*\*\*\* The sheltered housing unit for the nonhuman primates needs to have all surfaces in contact with the nonhuman primates cleaned and sanitized completely on the inside and all surfaces that are painted should be repainted or covered with another material which will allow for the required cleaning and sanitizing of these surfaces to be carried out. These surfaces currently do to weather conditions in this area have not been able to be maintained as normal do to the time the nonhuman primates have spent indoors do to the extreme cold temperatures which have been experienced in this area lately.

The rest of the interior of the nonhuman primate building needs to be cleaned and the painted surfaces need to be repainted or covered with a material which will enable the husbandry practices and maintance of this prtion of the building to be carried out as required.

TO BE CORRECTED BY: 6/10/14

### 3.125

#### FACILITIES, GENERAL.

(a) (Structural strength.

\*\*\*\*\* At time of inspection the top of the Alpaca enclosure fence between them and the Buffalo and along the side fronting the road had areas where tree limbs had fallen on it and caused the wire to become loose or broken. These areas of the fence need to be repaired to keep this fence in good repair.

\*\*\*\*\* The chain link fence located between the Zebra and Bear areas has become unfastened along the top in one area and pulled away from the Zebra building in another allowing for a gap next to the Zebra building which has a temporary fix in place. These areas of the fence need to be repaired to keep this fence in good repair and structurally sound.

## Inspection Report

---

TO BE CORRECTED BY: 5/10/14

\*\*\*\*\* The Buffalo and Deer shelter unit has steel siding which has become damaged along the west side that allow for some sharp edges which could cause injury to the animals in this pen if not repaired. Repair or replace this damaged steel siding to prevent injury to the animals and to keep this building structurally sound and in good repair.

\*\*\*\*\* The pig enclosure is made next to a steel building making up one side of their enclosure. They have damaged the steel siding in several areas and this is allowing for sharp edges which could injure the animals and affects the structural integrity of this enclosure as well as the building. This steel siding needs to be repaired or replaced to correct this.

\*\*\*\*\* The resting platform for the Tiger located next to the Lion is constructed of wood and the wood support along the bottom on the east side of this platform has become weathered and is failing along the front edge and needs to be replaced. The other wood construction of this platform should be evaluated at the time of repair to determine if more needs to be replaced.

TO BE CORRECTED BY: 2/11/14

This inspection and exit interview conducted by APHIS, USDA, Animal Care Inspectors and the Manager.

END OF REPORT.
